DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, 7-15, drawn to communication over free space having a plurality of contiguous regions served by respective fixed station via time division multiple access (TDMA), classified in class 370, subclass 337 (or class 455, subclass 63.1)
- II. Claim 4, drawn to interchanging time slots of a super frame in a time frame, classified in class 370, subclass 376.
- III. Claims 5-6, drawn to communication over free space having a plurality of contiguous regions served by respective fixed station via time division multiple access (TDMA), wherein each of the regions is subdivided into a plurality of sectors, classified in class 455, subclass 63.2

This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I recites embodiments 1-2, 5-10 described in figures 1-3 and 6-11 of the application.

Group II recites a third embodiment described in figures 4 of the application.

Group III recites a fourth embodiment described in figures 5 of the application.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

Application/Control Number: 09/529,440

Art Unit: 2667

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thai D Hoang whose telephone number is (703) 305-3232. The examiner can normally be reached on Monday-Friday 8:30am-5:00pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chi Pham can be reached on (703) 305-4378. The fax phone numbers for
